13th International Styrian Noise, Vibration & Harshness Congress

The European Automotive Noise Conference

www.isnvh.at

ISNVH 2024: Green & Digital (Twin) Transition June 19-21, 2024 Graz / Austria

Call for Abstracts

Topics:

Apart from traditional topics, such as:

- powertrain, transmission and drivetrain NVH
- intake and exhaust acoustics
- flow noise and aeroacoustics
- tyre-road noise
- sound absorption and insulation
- NVH trouble-shooting and problem solving

... we encourage the submission of contributions in the fields of:

- acoustic meta-materials
- smart surfaces / embedded sensors
- machine learning and data science for NVH
- interactive human-machine interfaces
- auditory and haptic perception, touch sound
- audio signal processing and reproduction

- active noise and vibration control
- noise & vibration quality and perception, sound design
- full vehicle NVH including pass-by
- NVH target setting
- **HVAC** acoustics
- squeak and rattle
- structural dynamics
- simulators (VR, AR and MR)
- NVH and automated driving
- vehicle component fitness monitoring
- new instruments, transducers and measurement techniques
- interior of the future and seat NVH
- vehicle infotainment

Abstract Submission:

The abstract must be submitted online (www.isnvh.at) in English including the title, the list of authors, their affiliations and an abstract text between 200 and 250 words.

Important Deadlines:

Abstract submission: Aug. 31, 2023 Please submit online at: www.isnvh.at

Full manuscript:	Dec. 15, 2023
End of review:	Feb. 29, 2024
Paper final version:	Mar. 31, 2024

General Information:

Congress Location: CONGRESS GRAZ Sparkassenplatz 1 8010 Graz, AUSTRIA

Congress Office: VIRTUAL VEHICLE Research GmbH

Inffeldgasse 21A, 8010 Graz
